

Announcing...

Special Antique Finishes

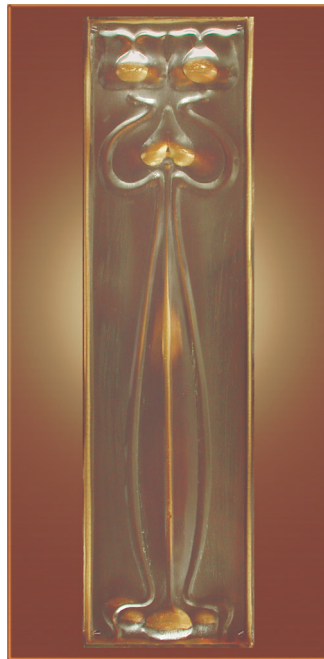

At last! Two *brand new* antique-looks to our highly acclaimed range of period style fingerplates. All the appearance of decades old brass and copper, without the decades long wait!

We are proud to announce a brand new range of finishes for our range of quality fingerplates - a first in our industry. These are ideal for creating the effect of aged fingerplates in your decor, without waiting years for the visual appearance of tarnish and polished relief!

Skilled craftsmen create each special antique finish by hand; no two plates are identical, and each will exhibit its own distinctive markings, colouring and relief. A thin film of non-sticky natural wax is also applied to the special finish coating, to lightly seal the surface whilst promoting *very* gradual wear with use. This means that, over a long period of time, the finish in parts is gradually worn away, to be replaced by genuinely aged base metal. The result is a whole plate aging naturally and gracefully; no flaking, chipping or unevenness.

To order, simply send in an order form, phone us on 08707 650 100 or visit our website at www.fingerplates.com.

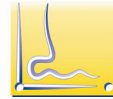

Duchess (above) and Sovereign fingerplates (left) with Special Antique Effect on Brass. Antique effect is strong and striking, gracefully offset by polished relief which highlights the raised pattern.

If you think our Special Effect Antique finishes closely resemble the "real thing", that's because our process borrows heavily on super accelerating the natural course of nature. After 12 months of continual development, we have succeeded in perfecting a proprietary process which rapidly promotes an aged effect, resulting in these two very special finishes. The copper antiquing process adds a warm tone with relatively less "age" effect, while the brass is more heavily dark-oxidised. Both effects are visually striking and very attractive.
